

6-25-2007

John,

I have been working with Regency Interactive for about three years now. I have found them to be very easy and responsive people to work with. The keyword optimizations that Regency has done for ADMET have provided great results. Our relationship with Regency has produced a steady increase in traffic to our web site. I am very pleased with both the results and the accessibility of information related to my keyword campaign from the folks at Regency.
