

Entrust your safety to the right specialist
in laboratory ductless filtration technology

August 10, 2007

Dear John,

As we are about to sign on for another year of service, I just wanted to write a few words and tell you how much we appreciate working with you and your company.

There is no doubt that the level of expertise and attention to detail makes all the difference when it comes to such a competitive industry and Regency Interactive was the right choice for us.

Sincerely,

Stephan Hauville
