Brandi and John –

After having had some bad experiences with SEO companies, Security Management Services International (www.smsiinc.com) signed up with Regency Interactive Corporation. Our primary contact was Brandi DeLancey. Our security consulting firm is a service oriented company and maintaining our website requires that the SEO provider takes the time to understand our business and our targeted markets. Brandi took the time and effort to see our business from the inside out. She is a pleasure to work with and she really listens to her customers. Regency and Brandi DeLancey have served our company with integrity and understanding, qualities not always found with SEO companies.

Regards,

William (Bill) Nesbitt, CPP
President, Security Management Services International, Inc.
